AT THE PORT OF ST. BERNARD

Port of St. Bernard:

BULK & GENERAL CARGO

Since we began operations at the St. Bernard Port, Harbor and Terminal District, we have set the highest standards for efficiency, innovation, and reliability by committing ourselves to uphold St. Bernard's position as a one port gateway for moving bulk and general cargo.

We maintain the ability and attitude to accomplish anything for our customers. We live up to this pledge with daily efforts to improve our processes, and we focus on delivering optimal results for all your dry bulk, break bulk and project cargo needs.

The Port of St. Bernard is located on the **Mississippi River** just five miles below New Orleans. Associated serves as exclusive stevedore and marine terminal operator at the Port's Chalmette Slip – a deep draft, slack water harbor at mile post 90.5 AHP.

We also operate four midstream berths at the Port of St. Bernard between mile posts 86.5 and 90.5 AHP.

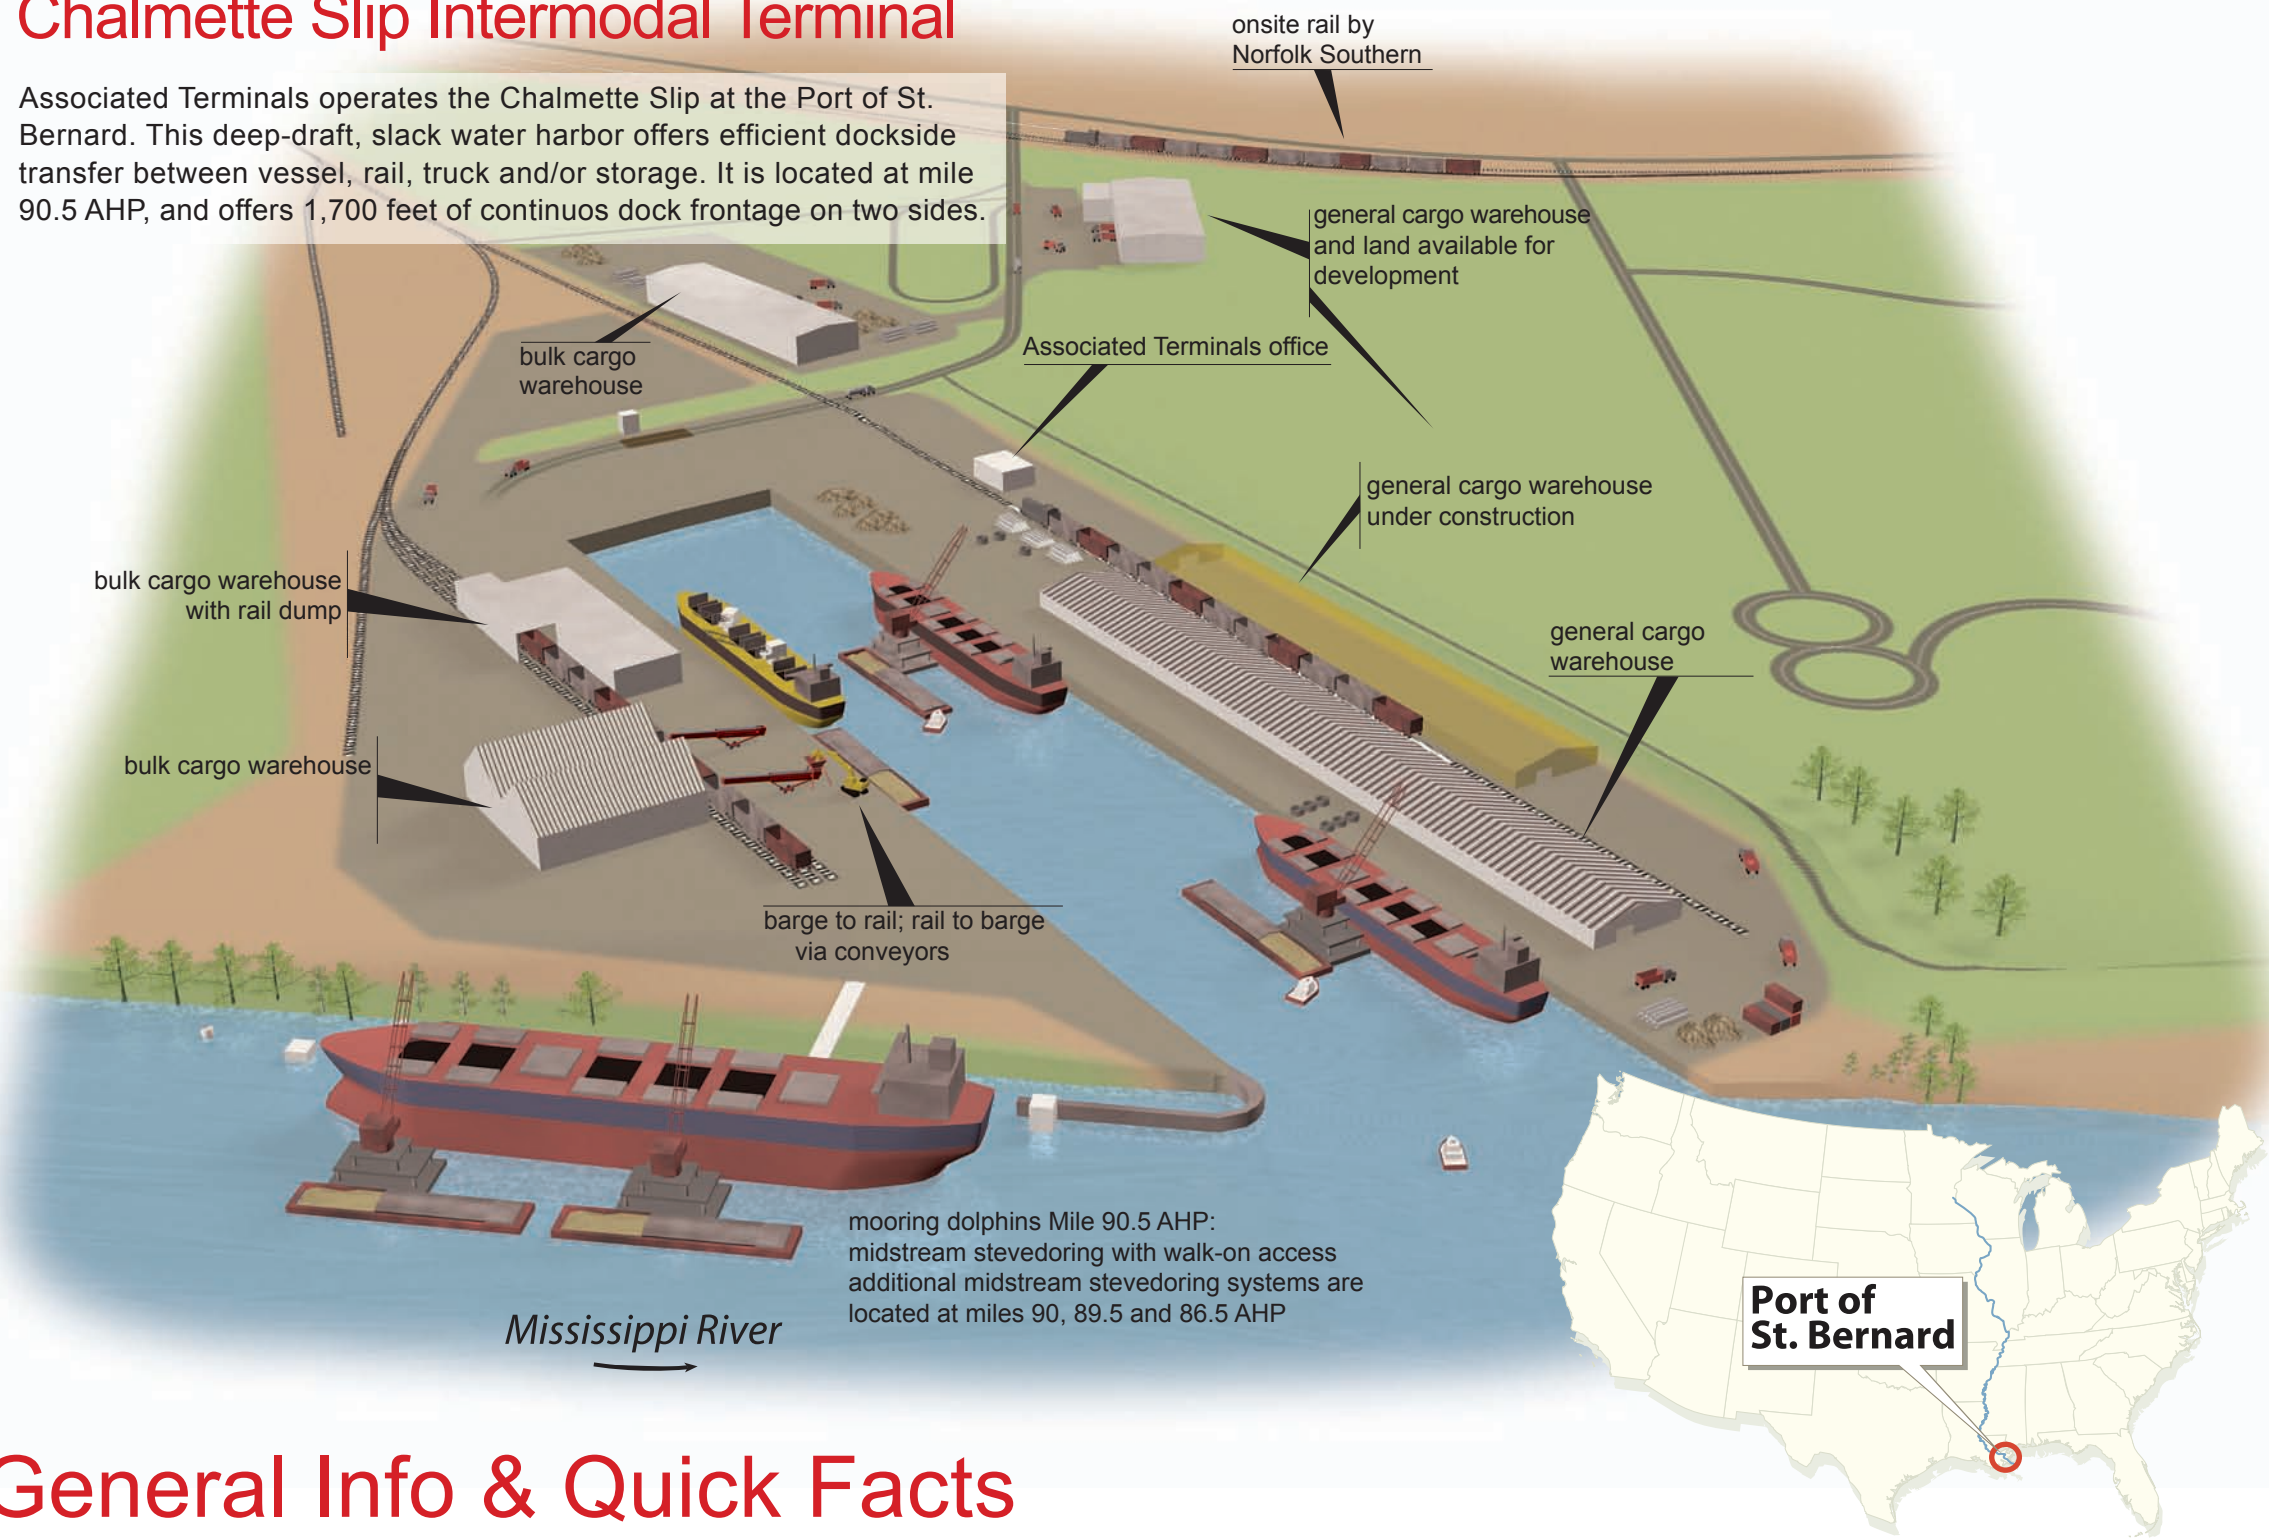

This brochure provides a snapshot of our St. Bernard operations. We invite you to learn more about our company, and we welcome your visit to our offices or the terminal.

Services Provided at St. Bernard:

- ❖ Dry bulk handling
- ❖ General cargo handling
- ❖ Project cargo & heavy lifts
- ❖ Rail to barge and/or barge to rail transfers
- ❖ Midstream stevedoring
- ❖ Logistics support
- ❖ On-site storage (covered and open)

Chalmette Slip Intermodal Terminal

Associated Terminals operates the Chalmette Slip at the Port of St. Bernard. This deep-draft, slack water harbor offers efficient dockside transfer between vessel, rail, truck and/or storage. It is located at mile 90.5 AHP, and offers 1,700 feet of continuous dock frontage on two sides.

The Port of St. Bernard's Chalmette Slip provides 1,700 linear feet of slack water berthing dredged to a depth of 33 feet. The harbor is an ideal spot for discharging break bulk and bulk products. Floating cranes, crawler cranes and a conveyor system move cargo from rail to barge, barge to rail and ship to barge or storage.

Added Benefits at St. Bernard:

- ❑ Experienced team and ideal facility for project cargo
- ❑ Only intermodal facility located below New Orleans on the Mississippi River
- ❑ Barge to rail or rail to barge operations available
- ❑ Shared vision for development between POSB & AT

Project cargo is a frequent sight at the Chalmette Slip.

Telestacking conveyors transfer cargo in rail / barge operation.

Four midstream berths, all with barge fleetings located nearby.

General Info & Quick Facts

The St. Bernard Port, Harbor and Terminal District is one of the premier marine transloading areas in the U.S. Gulf South. Deep draft shipping berths are available on the Mississippi River for midstream transfers, and harbor berths with adjacent dockside storage are available at the Chalmette Slip.

An Ideal Location

The Mississippi River is the backbone of the nation's inland waterway system. It serves as the front door to the Port of St. Bernard. And, when combined with St. Bernard's facilities,

provides customers an ideal location for transloading cargo between waterborne vessels and land transport options.

St. Bernard is served by Norfolk Southern Rail Corp., with switching access to six Class I railroads. Rail sidings serve each side of the slip, which facilitates simultaneous rail loading/unloading operations.

The terminal also provides inland waterway access for barge lines, and road transport options with easy access to I-510,

with convenient connections to I-10, I-55 and I-59.

Covered storage (240,000 sq. ft.), and open laydown area (150,000 sq. ft.) are available onsite for bulk and break bulk.

Years of experience and a reputation for excellent customer service are hallmarks of our work. Contact us to learn more about what we can do for your cargo moves through St. Bernard, or visit our website to learn more about our facilities and service profile. www.associatedterminals.com

Three floating cranes provide ship to barge unloading at the mile 89.5 buoys on the Mississippi River at the Port of St. Bernard.
